

Your safety is our top priority

We take all possible precautions to minimize risk and protect your health including

Screening all staff members prior to their shifts.

Screening all patients before entering the office.

Wait free reception area.

Common areas are cleaned with EPA disinfectants between patients visits.

PPE for admin staff (facemasks) enhanced PPE (gowns, N95 mask, bouffants, booties, face shields) for providers.

In accordance to CDC, OSHA and CT State guidelines the office has new Surgically Clean Air Purifiers in all operatorie's.

New updated HVAC with air scrubbers and UV light which improves on our previous system that had UV lights to kill and remove viruses and bacteria from the air.

We have special suction pieces that comfortable fit in to your mouth ,that has been scientifically proven to remove 90% of aerosols before they leave the patients mouth.

All of our treatment rooms have been closed off and isolated to prevent the movement of aerosols in to common spaces.
